

User Manual:

How to Install

1. First install XAMPP control panel in your pc/laptop from associated folder or download it from Internet and then install XAMPP control panel.
2. Then run the .jar file from dist folder in your pc/laptop.

To run the Software

1. Open the XAMPP control panel. Start Apache and MYSQL. Open the MySQL Admin.
2. Create a new database named “shop_management”. Open it. Click on the Import and then Browse it from given file named shop_management.sql file in My PHP Admin from.
3. Then minimize it.
4. Run the Application and enjoy it.

Please, use “1234” for vendor login .

Note: Without running the Xampp control panel,no sql query will executed.

Thank you.
